Education

The University of Queensland **Expected Graduation, May 2028**
Bachelor of Computer Science, Major in AI, Double Degree Program *Brisbane, Australia*

Universitas Indonesia **Expected Graduation, May 2028**
S.Kom in Computer Science, Double Degree Program *Jakarta, Indonesia*

Relevant Coursework

- Linear Algebra
- Discrete Mathematics
- Data Structures and Algorithms
- Databases
- Operating Systems
- Statistics Probability
- Intro to AI and Data Science
- Advanced Programming
- Software Engineering

Experience

Central Bank Indonesia **Jun 2026 – Present**
Data Intern, Dept. of Innovation & Digitalization *Jakarta, Indonesia*

- Built a **RAG-pipeline** for memo disposition using **LangChain** and **LangSmith** with local LLMs via Ollama, reducing memo-routing decision time by **75%**.
- Improved Terms of Reference (ToR) submission tracking efficiency by up to **60%** by developing an interactive Power BI dashboard that centralized procurement timelines, responsible units, project status, and target submission dates.
- Reduced manual procurement reporting effort by an estimated **50%** by transforming Excel-based procurement data using **Power Query** and **DAX**.

Infovesta Utama **Jul 2025 – Aug 2025**
Research and Consulting Intern *Jakarta, Indonesia*

- Reduced manual data processing time by **60%** by architecting a new workflow, enabling faster and more accurate analysis for over **900** IDX-listed companies.
- Leveraged Google Gemini 2.5 Pro for intelligent data extraction, ensuring high-precision capture of key metrics such as carbon emissions, employee demographics, and corporate governance structures.

Projects

AP-Analytics | *3rd Place, Find-IT UGM Hackathon 2026* **React | Python | Docker | Flyio | PostgreSQL**

- Developed an **XGBoost**-based Business Viability Index (BVI) Machine Learning model, scoring **MSME** business locations across competitor density, geospatial zoning, and socioeconomic indicators.
- Deployed the full-stack application using Docker Compose and Flyio, containerizing the PostgreSQL database, Node.js backend, and React frontend with health checks.

Career Path Compass Hub | *Winner of Best Tech Implementation* **PostgreSQL | ExpressJS | ReactTS | NodeJS**

- Led a team of 3 to design, develop, and deploy a full PERN-stack web application assisting students in tech career path selection.
- Architected and developed **REST APIs** for the project using React, Node.js, Express, and PostgreSQL.

Financial News Analyzer **JavaScript | Gemini API**

- Built an extension that extracts financial news, identifies affected public companies, and generates structured **sentiment and market-impact analysis** using Gemini.

Technical Skills

Programming: Python, JavaScript, TypeScript, SQL, HTML/CSS
Frameworks and Libraries: React.js, Node.js, Express.js, PostgreSQL, Supabase
Developer Tools: Git, GitHub, Godot Engine, Gemini API, N8N
AI Tools: OpenClaw, Hermes Agent, Unsloth, Hugging Face, LangChain, LangSmith, Ollama
Languages: English (Fluent), Indonesian (Native)
Others: PowerBI
